EVENING PAPERS .. MONDAY, 29TH JULY, 1940.
MORNING PAPERS .. TUESDAY, 30TH JULY, 1940.

EMPLOYMENT AND UNEMPLOYMENT : JUNE QUARTER, 1940.

The latest available statistics, from various sources, which offer some indication of the movement of Employment and Unemployment throughout Australia have been issued by the Commonwealth Statistician (Dr. Roland Wilson).

Employment in Factories. The number of persons employed in Australian factories in 1938-39 was 25.9% greater than in the pre-depression year of 1928-29, and 1.3% greater than in the year 1937-38. When the growth in employee population is taken into account, the 1938-39 index number was 11.6% greater than the 1928-29 index and 0.3% greater than the index for 1937-38.

A comparison of factory employment in May, 1940 (the latest month for which figures are available for all States) with May, 1939, shows the following estimated percentage changes:- New South Wales, -1.6; Victoria, +3.8; Queensland, +4.2; South Australia, +6.8; Western Australia, -3.6; Tasmania, +12.7; Australia, +1.7 (or taking account of the growth of employee population, +0.5).

Employment in Retail Stores. The index number for Australia for the year 1938-39 indicates a 30% increase in employment since July, 1933 (the first date for which figures are available), and a 1.3% increase since 1937-38. When the growth of employee population is taken into account the increases are 22.5% since July, 1933 and 0.2% since 1937-38.

A comparison of employment in retail stores in May, 1940 (the latest month for which figures are available for all States) with May, 1939, shows the following estimated percentage changes:- New South Wales, -0.8; Victoria, +2.8; Queensland, +1.8; South Australia, nil; Western Australia, +0.9; Tasmania, +8.2; Australia, +1.5 (or taking account of the growth of employee population, +0.4).

n.a. not available.

(a) From July, 1939 the State percentages are based on estimates computed from returns from "sample" factories, while the percentage for Australia is calculated on the assumption that the change in masculinity in the six States is equal to the change in the five States, other than New South Wales, for which sample masculinity figures are not available.

INDEXES OF EMPLOYMENT IN NEW SOUTH WALES AND QUEENSLAND.

Working from the basis of the results of the Census of 30th June, 1933, and from compilations made from returns of employers in remitting wages tax and returns collected from Government Departments, the Government Statistician of New South Wales has prepared an index of employment and unemployment covering all persons dependent on employment in New South Wales. The Director of the Bureau of Industry of Queensland publishes a table compiled from census results, unemployed insurance contributions, workers compensation records, and shop and factory returns. The table gives a comprehensive statement of all persons in work (other than relief work) in Queensland, whether as employees, employers, or independent workers. A full percentage of unemployment, covering the whole working population, is also shown; this percentage can be defined as the ratio of the number of persons seeking and capable of work and not in work, to the total of the working population.

Percentages of Employment and Unemployment - All
available wage-earners.

Owing to the incidence of enlistments and the replacement of male labour by females not previously engaged in gainful employment, it is not possible to estimate the numbers available for employment and the compilation of the indexes of employment and unemployment has been suspended for the present.

Period	Percentage of all who are dependent on and available for employment			
	(a) Including as employed the full-time equivalent of all part-time relief workers		(b) Including all part- time relief workers as unemployed	
	Employed	Unemployed	Employed	Unemployed
Census of 30th June, 1933	74.4	25.6	73.5	26.5
1936 - June ..	89.3	10.7	87.1	12.9
1937 - June ..	93.5	6.5	92.3	7.7
1938 - June ..	96.1	3.9	95.1	4.9
1939 - May ..	94.3	5.7	93.3	6.7
June ..	93.7	6.3	92.6	7.4
July ..	93.8	6.2	92.7	7.3
August ..	93.5	6.5	92.4	7.6
September ..	94.0	6.0	93.0	7.0
October ..	95.0	5.0	94.1	5.9
November ..	95.4	4.6	94.6	5.4
December ..	96.1	3.9	95.4	4.6
1940 - January ..	94.4	5.6	93.6	6.4
February ..	95.1	4.9	94.4	5.6
March ..	95.6	4.4	94.9	5.1
April ..	94.0	6.0	93.3	6.7

The indexes were revised in November, 1937. In estimating the increase in the number of persons dependent on employment allowance is now made for (a) increase in the proportion of females who are wage-earners, and (b) youths who were without occupation but were not recorded in the wage-earning group at the Census of 1933. Adjustment for seasonal variations in employment is not made except in respect of casual retail employees in December. At the Census of 30th June, 1933, 15,142 persons dependent on employment returned themselves as unemployed by reason of illness, accident, etc. or "voluntarily". This number, representing 1.8 per cent. of all persons dependent on employment is excluded from the indexes above, which relate to percentages of available wage-earners, employed and unemployed. The approximate number of persons in private employment was 478,000 in June, 1933; 689,000 in June, 1938; 679,000 in June, 1939; and 683,000 in May, 1940.

QUEENSLAND

Numbers in Work and Percentages of Unemployment.

Period	Numbers in Work				Percentage of Unem- ployment
	Employers and Workers on Own Account	Employees	Working for no Wages	Total	
Average -					
1926-27 ..	83,000	212,900	8,900	304,800	9.4
1927-28 ..	84,600	212,400	9,000	306,000	10.1

Three months ended -					
October, 1939 ..	106,600	259,400	10,600	376,600	6.5
November, " ..	106,800	259,800	10,600	377,200	6.4
December, " ..	106,900	259,000	10,600	376,500	6.7
January, 1940 ..	107,100	263,300	10,600	381,000	5.8
February, " ..	107,300	266,900	10,600	384,800	5.0
March, " ..	107,500	266,500	10,600	384,600	5.1
April, " ..	107,600	265,400	10,600	383,600	5.5
May, " ..	107,800	263,700	10,600	382,100	5.9

The foregoing table, compiled by the Queensland Bureau of Industry from census results, unemployed insurance contributions, workers' compensation records, and shop and factory returns, replaces that formerly published herein. It should be noted that the table covers the whole of the working population.

The figures for three-monthly periods have been corrected for seasonal variation.

TASMANIA : EMPLOYMENT

The following table compiled from the wages tax returns of private employers in respect of their employees, whether subject to or not subject to tax, and from returns of Commonwealth, State and Local Government employment, gives the best measure available of the course of total employment in Tasmania.

Period	Private Industry			Public Authorities			Total Employment Public and Private		
	Males	Fe- males	Total	Males	Fe- males	Total	Males	Fe- males	Total

(a) See Note 2 below.

1. For periods up to and including June, 1939, the figures in the table may be regarded as providing a virtually complete record of total employment. They are a combination of monthly figures received currently and annually, covering both private and public employment. They are deficient only to the inappreciable extent that some relief and other intermittent workers and domestic workers in private homes are not covered by the monthly returns. On the other hand, to the extent that they embrace the majority of workers subject to intermittent employment over the whole year, they reflect fully the seasonal and all other influences upon employment in Tasmania.

2. For the months of 1939-40 the figures are estimates based upon the current monthly movements of all public authority employment and of about 44 per cent. of total private employment. For a given month the figure of total private employment of the corresponding month of the previous year is changed in the ratio of the change of the current figure of private employment. The indication of the position for all employment in Tasmania given by this technical procedure must be read in the light of other indications of current change.

UNEMPLOYMENT.

QUARTER ENDED JUNE, 1940.

The percentages of recorded unemployment among members of reporting Trade Unions for Australia as a whole are given below for the June quarter of 1932, when unemployment was at its maximum and for each quarter from June, 1935 onwards -

AUSTRALIA

1932 - June quarter	..	30.0 per cent.
1935 - June quarter	..	17.8 " "
September "	..	15.9 " "
December "	..	13.7 " "
1936 - March quarter	..	13.4 per cent.
June "	..	12.8 " "
September "	..	12.0 " "
December "	..	10.7 " "
1937 - March quarter	..	9.9 per cent.
June "	..	9.7 " "
September "	..	9.3 " "
December "	..	8.2 " "
1938 - March quarter	..	8.0 per cent.
June "	..	8.6 " "
September "	..	9.2 " "
December "	..	8.9 " "
1939 - March quarter	..	9.6 per cent.
June "	..	9.5 " "
September "	..	10.2 " "
December "	..	9.3 " "
1940 - March quarter	..	7.9 per cent.
June "	..	10.5 " "

It should be noted that the figures refer to the mid-month of each quarter, and represent the conditions at the middle of that month. Consequently, the latest figures referred to herein relate to the middle of May, 1940.

Following the peak point (30 per cent.) in unemployment attained in the June quarter of 1932 the percentage dropped continuously to 8 per cent. in the March quarter of 1938, the lowest figure since August, 1927, when it was 6.7 per cent. After March, 1938, the index rose with minor fluctuations to 10.2 per cent. in the September quarter, 1939, but fell appreciably during each of the next two quarters. Concerning the rise to 10.5 per cent. in the June quarter it should be noted that, although coalmining employees out of work during the period of collection owing to the industrial dispute in that industry have been excluded from the tabulation, persons in other industries indirectly affected by the dispute have been included.

The usual tables for Trade Union Unemployment are appended.
